

Hazard Analysis The Nursery Project

Team #, Team Name

Student 1 name

Student 2 name

Student 3 name

Student 4 name

Table 1: Revision History

Date	Developer(s)	Change
Date1	Name(s)	Description of changes
Date2	Name(s)	Description of changes
...

Contents

1	Introduction	1
2	Scope and Purpose of Hazard Analysis	1
3	System Boundaries and Components	1
4	Critical Assumptions	1
5	Failure Mode and Effect Analysis	1
6	Safety and Security Requirements	1
7	Roadmap	1

[You are free to modify this template. —SS]

1 Introduction

[You can include your definition of what a hazard is here. —SS]

2 Scope and Purpose of Hazard Analysis

3 System Boundaries and Components

4 Critical Assumptions

[These assumptions that are made about the software or system. You should minimize the number of assumptions that remove potential hazards. For instance, you could assume a part will never fail, but it is generally better to include this potential failure mode. —SS]

5 Failure Mode and Effect Analysis

Component	Failure Mode	Effect of Failure	Cause of failure
Tray Dispensing	tray elevator motors fail	trays are not lifted into dispensinf position	tray elevator mo
Conveyor	Failure Mode	Effect of Failure	Cause of failure
Pot Dispensing	Failure Mode	Effect of Failure	Cause of failure
Verification	Failure Mode	Effect of Failure	Cause of failure

[Include your FMEA table here —SS]

6 Safety and Security Requirements

[Newly discovered requirements. These should also be added to the SRS. (A rationale design process how and why to fake it.) —SS]

7 Roadmap

[Which safety requirements will be implemented as part of the capstone time-line? Which requirements will be implemented in the future? —SS]
